Checkpoint 3 17-12-2021

Connected database to the Sms API, improved the SMS sending process enabled connection to proximity sensors.

Did a lot of work on the SMS API, and together we managed to make all necessary changes so that the API can receive information from the ESP and send it to the db. Furthermore, Ivan reworked the API s... Read more

Continued working on the database and made sure that all endpoints are connected. Always ready to help others.

Fixed issue with database

Good job on working on the client registration app

Checkpoint 2 26-11-2021

Worked on database connection and C# app. Did what's expected on time for the sprint review

Ivan is currently working on the database connection while also working on the registration application. He likes to help others when it's needed while also providing info regarding his own progress. ... Read more

Great work on creating the client registration app and making it work with the database!

Set up the database, and made it work with the C# app

Implemented the new MongoDB database and connected it to the visitor app

Checkpoint 1 15-10-2021

c4 diagram.

I worked on the visitor registration app, setting up a database and connecting the two together. I also worked on creating the

Created the foundation of the C# app.

Did some research for Sprint A

Good job on creating the C4 diagram.
